PROFESSIONAL PROFILE

Software Engineer graduated from the University of Buenos Aires (UBA) with solid training across the full software development lifecycle. Hands-on experience in distributed systems, machine learning, and scalable architectures. Looking to apply my knowledge to solve real-world problems.

EDUCATION

University of Buenos Aires (UBA) – School of Engineering Computer Engineering	Mar. 2021 – Jul. 2025
Colegio Nacional de Buenos Aires High School Diploma with a focus on Exact and Natural Sciences and Engineering	Mar. 2015 – Dec. 2020

PROFESSIONAL EXPERIENCE

PostMorfi – Founder & Software Engineer	Jul. 2026 – Present
- End-to-end product development: frontend, backend, infrastructure, and integrations with third-party APIs and services, incorporating AI-assisted development tools such as Claude Code and Codex. - Independently define product decisions, iterate on features based on real user feedback, and manage content, social media, and outreach. - Reached +380 users, +900 reviews, and +600 restaurants registered in its first week since public launch (August 24, 2026).	
Freelance Software Developer – Upwork	Dec. 2025 – Jan. 2026
- Python bot for scraping Florida public records: case search, filing downloads, and structured data extraction using the Claude API. - Web service with FastAPI deployed on Render, with concurrent scraping, pytest tests, and webhook integration with Make.com/Airtable.	
Cybersecurity Analyst Trainee – BTR Consulting	Sep. 2025 – Dec. 2025
Training in offensive and defensive cybersecurity: VAPT, SOC monitoring, incident analysis, risk management, and business continuity.	

PROJECTS

GEduNet – Network Simulator (Capstone project)	Aug. 2024 – Jul. 2025
- Educational web app in TypeScript to visualize networks, packet flow, and simulate protocols. - Simulates Application, Transport, Network, and Link layers: ICMP, ARP, TCP, and HTTP.	
SteamyAnalytics – Distributed Systems	
- Distributed pipeline for Steam data analysis with fault tolerance and high availability. - Node communication via RabbitMQ. Horizontal scalability with Docker Compose.	

TECHNICAL SKILLS

Languages: Python, Go, Rust, Ruby, C++, C, Java, TypeScript, SQL, Assembly
Cloud & DevOps: AWS, GCP (Cloud Run), Vercel, Render, Docker, Kubernetes, GitHub Actions
Databases: PostgreSQL (Neon, Supabase), MongoDB, Pandas, Spark, scikit-learn
Frameworks: FastAPI, Fastify, React, Spring Boot, RabbitMQ, Cucumber
AI Tools: Claude Code (agent-assisted development), Claude API, GitHub Copilot
Methodologies: Agile, CI/CD, Hexagonal Architecture, OOP, BDD
Languages (spoken): English (B2), Spanish (native)
